

PROGETTO

“Fishing governance in MPAs: potentialities for Blue Economy 2” (FishMPABlue2)

Luca SANTAROSSA
Project Manager
Federparchi – Europarc Italy

FishMPABlue2 in cifre

Finanziatore: Programma Interreg MED 2014-2020

Localizzazione delle attività: Italia, Spagna, Francia, Grecia, Croazia, Slovenia

Durata: Novembre 2016 – Ottobre 2019

Budget: 3.5 MEuro

Partenariato

	NAME OF THE ORGANISATION	COUNTRY	TYOLOGY
Lead Partner	Federparchi – Europarc Italy	Italy	PAs Federation
Partner 1	MedPAN	France	MPAs Network
Partner 2	CONISMA	Italy	Universities Consortium
Partner 3	WWF Adria	Croatia	International NGO
Partner 4	University of Nice - ECOMERS	France	Public University
Partner 5	WWF Mediterranean	Italy	International NGO
Partner 6	IUCN Med	Spain	International Organization
Partner 7	APAM Varois	France	Fishermen Network

Advisory Panel (Associati)

	NAME OF THE ORGANISATION	COUNTRY	TYOLOGY
Associate 1	GFCM-FAO	Italy	International Organization
Associate 2	RAC/SPA-UNEP	Tunisia	International Organization
Associate 3	MedWet	France	International Organization
Associate 4	CRPM	Belgium	International Organization
Associate 5	Croatian Ministry of Environment and Energy	Croatia	National Institution
Associate 6	Institute of the Republic of Slovenia for Nature conservation	Slovenia	National Agency
Associate 7	Spanish Ministry of Agriculture, Food and Environment	Spain	National Institution
Associate 8	Greek Ministry of Rural Development & Food	France	National Institution
Associate 9	Italian Ministry of Agriculture and Fishery	Italy	National Institution
Associate 10	French Biodiversity Agency		National Agency

Obiettivo generale

**Migliorare le capacità delle Aree
Marine Protette (AMP) del
Mediterraneo nel gestire in maniera
sostenibile la pesca artigianale (SSF)**

Obiettivi specifici

- **Sperimentare il “*Governance toolkit for small scale fishery - SSF*”** in differenti tipologie di AMP, al fine di sviluppare una versione “collaudata” del toolkit
- **Disseminare il toolkit** collaudato a quante più possibile AMP del Mediterraneo
- **Favorire l’integrazione di principi e raccomandazioni** scaturiti dal progetto **nelle politiche nazionali ed internazionali** per favorire un maggior coinvolgimento dei pescatori artigianali nelle politiche di gestione sostenibile delle risorse marine

Le 11 AMP pilota

Il Governance Toolkit

- **5 componenti** per un governo efficace della SSF
 - a. *Enforcement*
 - b. pescatori coinvolti nelle attività della AMP
 - c. e nel processo decisionale,
 - d. incentivi per la sostenibilità ambientale della SSF
 - e. piano di gestione della pesca

- **Una lista** di misure concrete di gestione suddivise per aree di azione

The SSF Governance Toolkit (2)

Typology	To address conflicts and resolution	To improve MPA governance
Enforcing MPA capacities	Setting limits and quota for fishing licenses (all types) in order to reduce fishing effort inside the MPA	Clarify the governance structures, i.e. roles and responsibilities of different authorities and organizations
	Establishment of territorial rights to safeguard the fishing efforts of local fishermen and limit the entrance of new fishermen	Better coordination between central and regional government systems
	Involve the local fishermen in the surveillance activities	Increase the time units and surface of MPA surface surveilled
	Involve the local fishermen in the monitoring activities	Increase the number of monitoring campaigns and species monitored
	Development of specific regulations to promote other inter-sectorial income-generating activities (e.g. pesca-tourism)	Coordinate national and regional legislation on conservation, fishery and tourism
	Strict enforcement of the management plan (technical measures, market traceability, etc.)	Design a management plan on small scale fishery with the involvement of local fishermen
Participative	Institutionalization of a stable relationship with stakeholders, particularly SSF fishermen, aiming to a transparent exchange of information and cooperation	Partnership programs/agreements between fisheries and MPA management body
	Identify actual fields where the participation of different stakeholders groups, in particular professional fishermen, in the decision making process is feasible	Adopt legal frameworks to involve fishermen in decision making procedures
	Strengthening organizations representing local fishermen	

The SSF Governance Toolkit (3)

Knowledge	Promoting recognition of the actual benefits of MPAs for fisheries (i.e. spill-over effects, exchange of fishermen experience) to build community support	Increase the monitoring of actual positive effects of SSF management within own MPA
	Promoting recognition of the benefits of fisheries reserves to biodiversity conservation	Develop a methodology in order to design management plan with this dual objectives (IUCN Category VI of MPA)
	Promotion the integration of scientific with traditional knowledge and dissemination of both	
	Promoting the awareness of MPA zoning, objectives, and regulations e.g. use of GIS location devices)	
Economic	Allocation or re-enforcement of fisheries rights to local fishermen	Specific fund-raising for joint activities involving MPA managing body and local artisanal fishermen
	Support to local fishermen for the development of a “short supply chain” for the fish sector	Increase the fish-related promotion skills and actions of the MPA
	Certification or labelization of halieutic products	Increase the fish-related marketing skills and actions of the MPA
	Promoting cooperation among local fishermen	Supporting the establishment of fishermen cooperatives
Interpretative	Promote public communication, education and awareness raising	Increase the understanding of policy makers on small scale fisheries and their issues

Risultati ad oggi

- **Creati 11 LGCs:** in ogni AMP pilota, un “*Local Governance Cluster*” (AMP+pescatori artigianali+altri soggetti locali) è stato creato
- **11 PPIPs sono stati adottati e sono in corso di attuazione:** in ogni AMP pilota, il LGC ha selezionato alcune misure dal «Governance toolkit» e le sta testando
- **Capacity building:** formazione su metodologie di monitoraggio ecologico-socio-economico relativo alla SSF
- **Campagna di monitoraggio Ex-ante:** per fotografare la situazione pre-attuazione delle misure di gestione; seguirà la campagna “Ex post” per verificare gli impatti

Diffusione dei Risultati

- **Piano di Disseminazione:** 3 exchange-visit (di cui una già realizzata a Torre Guaceto), evento di formazione regionale sui primi risultati della sperimentazione del toolkit (Telascica 9-11 ottobre), “Sharing-experience regional workshop (Palma de Mallorca, 13-15 Novembre), adozione del Governance Toolkit da parte di almeno 5 ulteriori AMP, eventi di disseminazione nazionale
- **Strategia Comunicativa :** 3 press-trips (di cui due già realizzati, a Cap Roux e alle Egadi), 11 video-pillole, mostra fotografica, Conferenza Finale (Italia, ottobre 2019)
